Grand Total:		3,807		\$9,426,543	

Note 1: This report only includes costs for energy efficient measures and health and safety measures that used Public Benefits funds. The total invoiced costs for all measures and all funds was \$26,252,864 for contract year 2002. Public Benefits invoiced costs for installed measures was 43% of the total expended on all measures. PB funds were only expended in participating Public Benefits electric utility regions.

Note 2: Actual invoiced Public Benefits measures costs for contract year 2002 was \$11,167,567. The Estimated Public Benefits Install Costs indicated on this report are less than invoiced because not all weatherization agencies include all program support costs in their reported measures costs. Invoiced costs cannot be displayed by county or electric vendor, so reported unit measures costs were used instead.
